# Registration Form

## Continuing Education Seminar

**Come join us for 6 hours of Continuing Education Credits, Camaraderie, and Fun.**

**Guest Speaker starts at 8:00 AM**

Check in starts at 7:15 AM so **come early so you can "shop"** at our various tables filled with a variety of items to purchase, along with tickets for drawings, and gifts to be raffled off during lunch!

Light refreshments available in the morning.

Lunch from 12:00-1:00 will be provided while we have the gift drawings!!!

All courses will be 2 CEU's and the speakers presenting will be:

**Lillian Caperila, RDH, MEd**

**Premier Dental Products Company**

**The Challenge Is Caries Control...Are You Playing It Safe Or Calculating Your Risks?**

Course Objectives

- ◇ Identify key factors on the CAMBRA form
- ◇ Identify clients risk for caries
- ◇ Differentiate among product technologies and focus on benefits, limitations and applications.
- ◇ Review of case studies to determine risk, compliance, dietary and pH interactions.

With the latest in remineralization therapies and the need to implement a risk assessment to determine a patient's level of risk for dental caries, the participants will gain significant steps in managing their treatment to reverse or eliminate this persistent disease. Relevant case studies will be presented using the CAMBRA survey and allowing the group to recognize the best course of treatment which includes anti-bacterial, fluoride and remineralization agents for at-home and in-office applications

**Floyd Butz IV MPH, RDH, CPH**

**Faculty, Health Service Administration, St. Petersburg College**

**Medical Errors And The Dental Team: Prevention, Recognition and Resolution**

Course Objectives

- ◇ Define what is a medical error and the different types of medical errors
- ◇ Explore the ways to reduce errors and increase prevention
- ◇ Identify elements that increase the risk for medical errors
- ◇ Review processes for improving patient outcomes
- ◇ Define root cause analysis
- ◇ Medical errors plague both the medical and dental industries on a yearly basis.
- ◇ This course will focus on the practitioner and how they can think systemically and act logically in an effort better protect the patient. Additionally, this course will help to reduce adverse events and build a safe patient atmosphere. Patient safety will be explored as a means to better treat the public we serve.

**Karen Hodge RDH, BASDH**

**Adjunct Instructor, Dental Hygiene Program, St. Petersburg College**

**Saving Stem Cells For The Future**

Course Objectives

- ◇ Review the basics of stem cell technology
- ◇ Review the different type of stem cells
- ◇ Discuss potential uses for stem cells in medicine and dentistry
- ◇ Understand the collection and storage of dental stem cells

Currently there are incredible medical advances in regards to tissue regeneration with stem cells. This course will review some of these advances as well as dentistry's part in this relatively new technology

**Return no later than postmarked  
October 17<sup>th</sup>**
